What is the Cigna Dental Oral Health Integration Program?

It's a program that reimburses out-of-pocket costs for specific dental services used to treat gum disease and tooth decay. The program is for people with certain medical conditions that have been found to be associated with gum disease and cavities. There's no additional cost for the program – if you qualify, you get reimbursed!*

Do I qualify?

If you have a Cigna dental plan, you're eligible for the program. You do NOT have to be enrolled in a Cigna medical plan to be eligible for this program. You must currently be under treatment by a doctor for any of the following conditions:

- › Heart disease
- › Stroke
- › Diabetes
- › Maternity
- › Chronic kidney disease
- › Organ transplants
- › Head and neck cancer radiation

How does it work?

When you visit your dentist, you will pay your usual out-of-pocket costs (deductible, copay or coinsurance amount). As a reminder, your copay is the fixed amount you pay for covered services, and your coinsurance is the percentage of costs you pay for covered services. Next, your dentist will send Cigna a claim. We review the claim and will refund your out-of-pocket costs for eligible dental services. Once we receive your claim, you can expect to be reimbursed in about 30 days. You must enroll in this program prior to receiving treatment to be eligible for reimbursement.

What else does the Oral Health Integration Program include?

When you join the program, you get discounts on prescribed mouthwashes, fluoride gels, and toothpastes from your dentist through Cigna Home Delivery Pharmacy** who will help you get these items sent right to your home.

You can ask us for information on issues that affect your oral health and your overall wellness – such as fear of going to the dentist. Or the impact of stress or tobacco products. We'll also give you guidance on how to overcome these behaviors.

Together, all the way.®

Offered by: Cigna Health and Life Insurance Company, Connecticut General Life Insurance Company, or their affiliates.

What are Periodontal Treatment and Maintenance?

Periodontal treatment and maintenance are not the same as prophylaxis or "regular cleaning." Periodontal treatment (or "scaling and root planing") consists of "deep cleaning" which involves parts of your teeth below the "gumline." During scaling and root planing, the dentist may numb the area of your mouth that s/he is working on. Periodontal maintenance is a follow-up procedure involving removal of plaque and calculus (tartar) above and below the gumline along with scaling and root planing in areas where needed.
